ABOUT US

Flex VRA is the first and only visual reinforcement audiometry system that provides the audiologist complete control of the reinforcement stimulus.

Utilizing a wide variety of video sources, Flex VRA is designed to be the most engaging and kid-friendly VRA system available.

THE REMOTE

Stimulus Options
1

Choose from a wide variety of videos including live-action toy, animal, and cartoon!

Stimulus Options (with lights)
2

An animated light bar is available for built-in cartoon, animal, and toy video stimulus.

Animated light bar not available for custom uploaded content.

ALL and DISTRACT
3

"ALL" allows for all monitors to be activated simultaneously to localize the patient to the stimulus.

"Distract" will turn the monitors on with one button click and remain on until the button is pressed again. This can assist in distraction during tympanometry or OAE testing.

Custom Content
4

Custom content can easily be uploaded to the 3 custom buttons by a provided Flex USB stick.

End User responsible for providing files to upload. Flex VRA will not ship with custom content loaded.

Volume Control
5

Volume can be tailored to the patient by the "up" and "down" buttons. In addition, you can also mute the monitors if sound is not desired.

Video Control
6

Video skip and repeat options are available for all content, but they are most helpful when navigating custom content.
