

People First

People First is our promise to empower people to communicate freely, interact naturally and participate actively

Stay Connected.

Streamer Pro. The heart of ConnectLine.™

Streamer Pro acts as a remote control for whatever you wish to stream into your Oticon hearing devices. It's worn around your neck and has three easy-to-use buttons for ConnectLine's core media applications: Phone, TV and Microphone. Streamer Pro's simple controls are right at your fingertips, so you can connect with everything effortlessly.

15500-2703/08.13

ConnectLine

connects you with a world of entertainment, information and ideas.

Microphone

Understand more when a discreet wireless microphone is worn by the person you're speaking with.

Teleloop

Enjoy easy access to loop systems in theaters, lecture halls, religious services and homes.

FM

Tap into clear-sounding FM listening systems in lecture halls and classrooms.

What is ConnectLine?

ConnectLine is a series of devices that transform Oticon hearing devices into personal wireless headsets. Now phone conversations, TV, your favorite music, computer and mobile video chats, podcasts, live performances and presentations can

be streamed directly into your hearing devices. Imagine being able to walk out of the room while you're watching TV or listening to the radio, and not miss out. There's even a mini-microphone that's about the size of a tie clip. Put it on a friend or family

member's collar and you can enjoy what they're saying in a noisy spot like an outdoor café. ConnectLine is designed to connect you with ease. Ask your hearing care professional to show you how.
