* Bandwidth accessible for gain adjustments during fitting

** Battery size 10 - IEC PR70.

Real usage battery life is shown as an estimated interval based on mixed use cases with variable amplification settings and variable input levels.

• Default

o Optional

- Not included

OpenSound Navigator™ continuously analyzes the environment and attenuates the disturbing noise.

NFMI wireless technology is optional and provides binaural communication

Oticon Open is built on the Velox™ platform, providing frequency resolution in 64 channels (Open 1).

Fully programmable with updatable firmware, the Velox platform is ready for the future.

IRIL (IEC 60118-13:2016)		700/1400/2000 MHz: 18/12/11 dB SPL					

* Measured with the gain control of the hearing aid set to its full-on position minus 20 dB and with an input SPL of 70 dB. This is to obtain a gain response equal to the full-on gain response from e.g. IEC 60118-0+A1:1994 but without influence of feedback.

** Battery current is measured according to IEC 60118-0:1983/AMD1:1994 §7.11, IEC 60118-0:2015 §7.7 and ANSI S3.22:2014 §6.13 after a settling time of minimum 3 minutes.

*** Based on the standardised battery consumption measurement (IEC 60118-0:1983/AMD1:1994). The actual battery life depends on battery quality, use pattern, active feature set, hearing loss and sound environment.

Technical information: Omnidirectional mode is used unless otherwise stated.
