

TELEAUDIOLOGY GUIDE

TELEAUDIOLOGY

CONSIDERATIONS FOR YOUR PRACTICE

There is growing need for telemedicine in all sectors of healthcare, including audiology. The demand for hearing healthcare outweighs audiologic testing capabilities. It has been projected that there will be a shortfall of providers for hearing healthcare services. In addition to the lack of hearing healthcare providers, the aging population is growing substantially, and patients are finding it more and more difficult to get access to hearing healthcare in a timely or convenient manner. There is also an increased focus to testing at a distance with limited physical exposure to protect patients and providers.

GSI's new Teleaudiology Guide provides an in-depth overview of the current technology landscape including synchronous and asynchronous options, what GSI offers, and how to implement teleaudiology in your practice.

EXPLORE ALL OF OUR RESOURCES

As technology and learning preferences continue to evolve in the field of audiology, GSI ADVANCE is the next generation of learning from Grason-Stadler, providing online education at your fingertips.

GSI ADVANCE offers educational content that covers a wide variety of topics and learning mediums, from webinar courses that are CEU credit eligible, to a full library of quick videos and ask the expert topics.

STAY CONNECTED!

If you would like to stay informed on all upcoming GSI ADVANCE offerings, please join the conversation and sign up for ADVANCE Alerts.
