Oticon Opn™ By The Numbers
Survey* shows Oticon Opn users experience less effort, better recall and better speech understanding in noise!

96% heard better – much better
81% understand more with less effort

62% keep up with the conversation

70% were “very satisfied” – no surprise, studies show a correlation between sound quality and user satisfaction

43% take advantage of Opn’s direct streaming to stream audio information

49% participate in more social situations

1 out of 2 felt sounds in the environment are more balanced and natural
1 out of 3 are more confident when wearing Opn

*700 Opn users voluntarily mailed response cards to share their personal perceptions of the open sound experience. The users (average age 61-70 years) had worn Opn for 12 weeks or less.
