

Oticon More™ hearing aids

A hearing aid designed to support your brain

Did you know that even with mild, untreated hearing loss, your risk of dementia can double? In a 25-year study,* people with hearing loss, but not using hearing aids, had a higher risk of dementia. And since science shows that we hear with our brains and not our ears, having a hearing aid that supports your brain is all the more important.

Oticon More with BrainHearing™ technology is a revolutionary hearing aid that gives the brain more of the relevant information it needs to make better sense of sound, so you can get better speech understanding with less effort and the ability to remember more. Take better care of your brain, and your brain will take better care of you.

Oticon More:

- Delivers 30% more sound to the brain**
- Increases speech understanding by yet another 15%**
- Reduces sustained listening effort by 30% so that you can remember more of what is being said***

More connections. More conversations. More life.

Staying connected to family and friends is more important than ever. With Oticon More, you also get a wide range of connectivity options for a high-quality listening experience in everyday situations so you can go through your day with more confidence and convenience.

- Enjoy the convenience of two-way hands-free communication with select iPhone and iPad devices and direct streaming from select Android™ devices****
- ConnectClip enables streaming from any Bluetooth® device and enables comfortable hands-free calls
- Stream sound directly from your TV with Oticon's TV adapter
- Use Oticon ON app for easy, discreet control over the hearing aid from your fingertips

Made for a full day's power,† everyday

Superb sound quality with the style and groundbreaking features you want to enhance your life, all designed into one compact device. The Oticon miniRITE R and new miniBTE R are discreet lithium-ion rechargeable styles that provide a full day of battery life†, including streaming, after just three hours of charging.†† Better hearing and speech understanding in a variety of environments, with less effort and worry-free rechargeability for more convenience. That's Oticon More.

- Choice of a sleek desktop charger or the new SmartCharger for on the go rechargeability
- Quick recharge of 30 minutes for an additional six hours of power†††

For users who prefer traditional hearing aid batteries, Oticon More is also available in non-rechargeable styles: Oticon More miniRITE T and Oticon More miniBTE T.

Made for
iPhone | iPad | iPod
