

People First

People First is our promise to empower people to communicate freely, interact naturally and participate actively

Offering you a first-class hearing solution - in a compact and stylish design

119803UK / 01.12 Printed on 100% recycled paper

Now you can get premium benefits in a stylish solution – it's the Oticon miniBTE

If you want to take the hard work out of listening and improve your ability to understand speech in noise, you should try Oticon Agil hearing instruments.

The amazingly small miniBTE shell houses some of the most powerful sound processing technologies available. Invisible systems that make it easier to get involved in conversations - even when the going gets tough.

The introduction of the miniBTE style means our best-in-class technology in a much smaller, and very stylish package.

For your pleasure, it is designed to optimise discreetness and wearing comfort:

- ▶ Compact organic shape follows the ear lobe contours and hides nicely behind the ear
- ▶ Easy operation with user-friendly push button

The new Oticon Agil miniBTE
is small, beautiful and stylish
– **discover it for yourself**

**You are invited to try it
and experience for yourself**

Oticon Agil is designed
to let you understand better
with less effort

Oticon Agil is our unique premium hearing solution, designed to empower you to understand more with less effort. Being our best selling high-end hearing solution ever, it has proven to deliver significant benefits in terms of speech understanding and reduced listening effort.

Based on our latest and most advanced sound processing technologies, Oticon Agil grants your hearing the crystal clear signal fidelity that takes the hard work out of making sense of sounds and following a conversation, even in challenging and noisy situations.

Premium benefits of Oticon Agil are for everyone

Behind-the-ear instruments are available in seven skin and hair colour tones.

Oticon Agil is a complete line of hearing instruments, the miniBTE being the latest addition to the comprehensive selection of styles.

No matter your preference for design, style and comfort and whatever your degree of hearing loss, from mild to severe, you can find a solution with Oticon Agil - giving you its unique benefits.

**Keeps you connected
in practically all situations**

Oticon ConnectLine is a complete system that helps you get more out of your hearing in more situations than ever. With the Oticon Streamer, you will be able to control a wide range of standard wireless Bluetooth™ devices - and even adjust the volume and programmes of your Oticon Agil instruments.

With ConnectLine you can turn your Oticon Agils into a wireless headset for a mobile or landline phone.

ConnectLine also works with your television, PC and even your iPad, iPod and other music players.

If this idea sounds enticing, ask your Hearing Care Professional for more details.
