

Oticon ♦ Dual

Don't let anyone tell you  
it's better to wait

**oticon**  
PEOPLE FIRST

## The clock is ticking on your hearing

### **Are you getting ready to fight back?**

Having issues with your hearing shouldn't stop you from getting the best out of life. You have a choice: to act now and move forward, or put things off and fall behind.

Oticon Dual is for those who choose to forge ahead. Dual combines the best of design with the best of performance to support not only the way you hear, but also the way you live.

With Dual your life will no longer be ruled by your hearing loss. You'll be in charge again.

### **A beauty on the outside and a sensation on the inside**

Dual's exceptional sound quality can be attributed to a unique concept called Spatial Sound. This new technology is to hearing devices what high-definition digital imaging is to TVs.

By providing extra 'audio pixels' that inject vibrancy, clarity and depth into your sound picture, Spatial Sound will make you feel more in touch with the world than ever.

Dual's good looks and attractive colours make it a pleasure to wear. It's also virtually invisible, which does wonders for your confidence.

With Dual, great sound never looked better. It's this duality that puts Dual in a class of its very own.

Don't give up!  
You can get near-natural hearing

# Spatial Sound feels more natural

Wouldn't you rather hear the world the way it's meant to be heard? With traditional hearing aids this can be difficult because they don't offer the kind of teamwork Mother Nature intended.

A pair of Duals work together to help you perceive sounds more naturally. They capture a wider range of sounds – and preserve the subtle details – so voices sound clearer and music far richer.

#### **Know where sounds are coming from**

With Spatial Sound you'll be able to locate and identify individual sounds without even thinking about it. And you'll enjoy a new-found sense of freedom in the process!

Know where to look – without even thinking about it

If someone starts talking, you'll be able to focus on them immediately. If a car or person approaches from behind, you'll instinctively know where to look. You'll even be able to spot birds singing in the trees!

#### **Regain your confidence**

With Dual, sounds will make perfect sense again. When you know who is speaking and can hear what they're saying, you'll be able to join in even fast-flowing conversations with ease.

Wouldn't you like to be able to trust your hearing again? With Dual, any listening situation will feel comfortable and natural. So you can relax and let the real you shine through!

Don't just be there, be part of it

Relax and enjoy clear, crisp and comfortable sound quality

Don't let anyone tell you  
you're getting old

# Getting hearing devices is not about getting old... it's about being smart

Don't let anyone tell you you can't watch TV or talk on your mobile phone just like everyone else. Dual comes with a smart accessory option called the Streamer, which helps you make the most out of modern lifestyle technology.

The Streamer literally turns your Dual devices into a tiny hands-free headset that sends sound wirelessly right into your ears. Connect your television, mobile phone, MP3 player, computer or any other device that is Bluetooth compatible to the Streamer.

With the Streamer you can switch from listening to music to answering a phone call just by touching a button. The Streamer also works as a remote control for Dual, so you can change the volume or switch listening programs very easily.

Streamer is available in black or white. Available with the Connect Series except Dual Pro.

## Get connected

**to your TV:** Hear crystal clear sound with no audio delay, hum or noise. And enjoy full mobile phone connectivity when listening to TV.

**to your mobile phone:** Communicating becomes more pleasurable when the caller's voice is automatically sent straight to BOTH hearing devices.

**to the car radio:** Listening is more enjoyable when you don't have to worry about the volume.

**to your computer:** Never miss a sound as you watch, play and interact with your computer.

**to an MP3 player:** Your Dual devices become tiny wireless headphones.

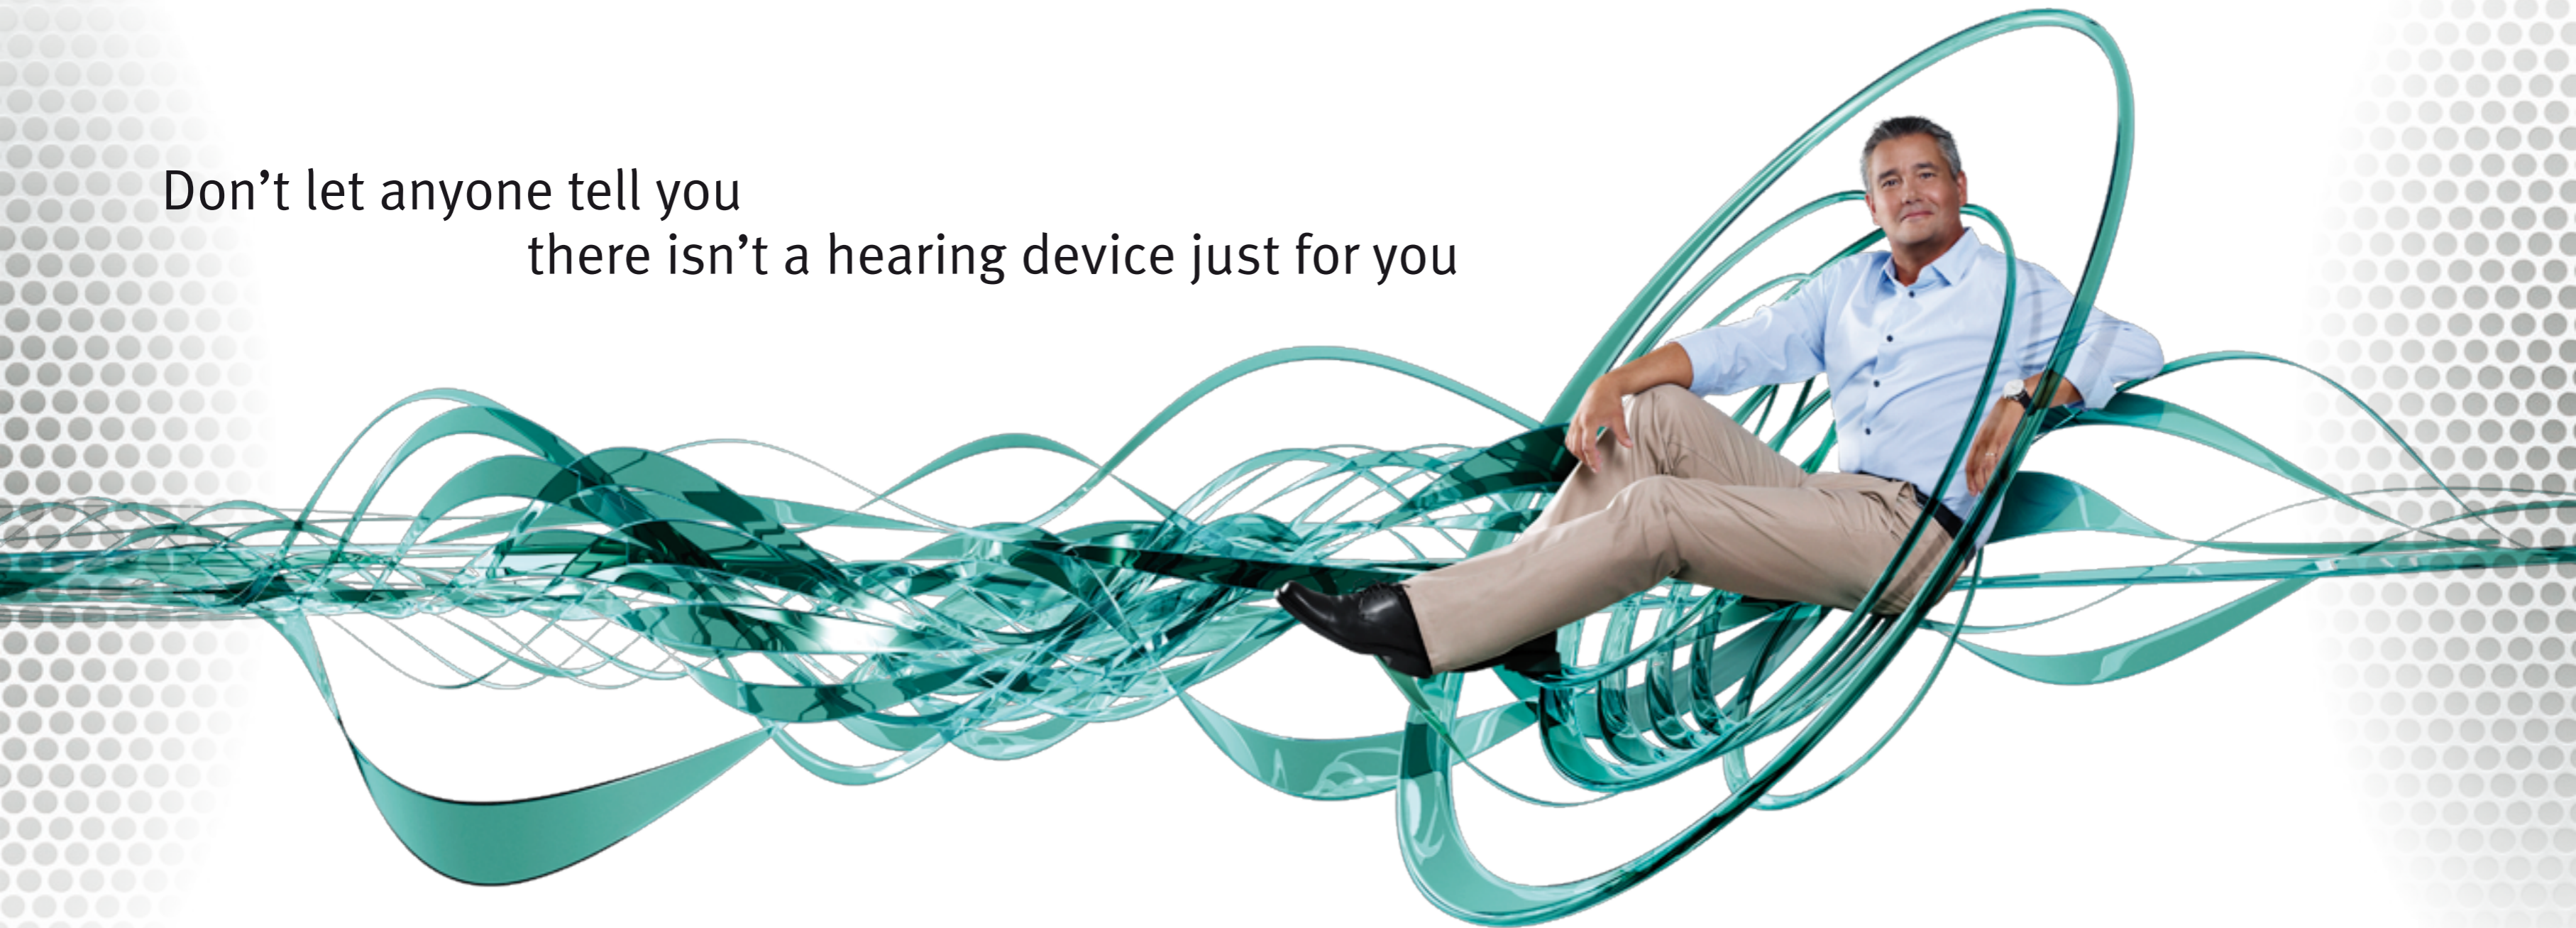

**to a PDA:** Get wirelessly in sync with your PDA.

**to your Hi-fi stereo system:** It will feel like your very own 'Direct Feed'.

Don't let anyone tell you  
there isn't a hearing device just for you

# There's a Dual for everyone

Everyone can wear Dual with ease. From size and colour to performance, accessories and settings, a pair of Duals can be completely customised to fit your personal preferences and level of experience with hearing devices.

There are two kinds of Dual: Dual Connect and Dual Mini. All models in these series are available in a range of appealing colours to match your hair, skin tone or favourite outfit!

## Go wireless with Dual Connect

If getting closer than ever to natural hearing is your ambition, Dual Connect will take you there. This wireless wonder also connects you to modern lifestyle technology via the optional Streamer accessory. Dual is the ultimate in hearing aid design and performance.

## Go invisible with Dual Mini

If the most advanced technology in the smallest package is what you most desire, Dual Mini is the solution. These discreet devices pack so much processing power that they outperform any other instruments in this category.

Your hearing care professional will help you find the Dual that's right for you. But no matter which style they recommend, you can be sure that Dual will exceed your expectations.

**Don't just listen to us – listen to Dual. Act today – and experience the difference yourself!**

## People First

We believe that it takes more than technology and audiology to create the best hearing instruments. That's why we put the individual needs and wishes of people with hearing loss first in our development of new hearing care solutions.
