Experience more

Designed to meet the unique needs of severe-to-profound hearing loss, Trek is a device that's miles ahead. Trek helps you embrace the conversations, connections, and sound experiences of everyday life by optimizing volume and clarity with greater precision.

## Meet Trek.

### Experience the world more accurately.

Trek is the newest family to join Sonic's revolutionary **SoundDNA** Technology Platform. It offers our most powerful solution for natural sound and better hearing to help you experience more of the world around you.

With a stylish design, wireless connectivity, and personalized features, Trek will take you further.

Trek is versatile and adapts to your preferences. Robust protection from water and dust makes Trek ready for wherever life takes you.

Trek Super Power and Ultra Power BTE

## Experience More

Available in two styles and two performance levels, Trek is ready for all of life's adventures. It includes dependable features like these to make Everyday Sounds Better.\*

**Speech Variable Processing** makes speech easier to hear in everyday situations

**Speech in Noise Management** reduces unwanted noise so you can better understand conversations in challenging situations

**Adaptive Feedback Canceller Pro** silences the squeal of feedback so you won't be distracted

**Tinnitus SoundSupport** temporarily relieves ringing in the ears with customized sounds

**Frequency Transfer** shifts high-pitched speech cues to a range that allows you to better identify consonants

**Volume Control Step Size** allows for finer, more precise adjustments to your hearing aid volume

**Trek has added options to keep up in even more places.\*\***

**SmartCompress** keeps sound natural in changing listening environments

**Extended Dynamic Range** keeps loud sounds clear in spaces like movie theaters or places of worship

**Binaural Noise Management** decreases uneven noise from one side for more balanced sound, which is helpful when traveling in a car or when listening at lively gatherings

\* Not all features and options available on all technology levels or models. Ask your Hearing Care Provider for details.

\*\* Trek 80 only.

**Trek's IP68 rating means impressive protection against water and dust. Ask your Hearing Care Provider for details.**

## Stylish by Design

Trek is available in six sophisticated colors and two models, with either size #13 or #675 battery. Ask your Hearing Care Provider which is best for your needs and preferences.

## Welcome to Wireless

Savvy with your smartphone and Bluetooth® devices? Learn all the ways Trek can connect you to the world of wireless.<sup>1</sup>

### Dual-Radio System

Stream calls or music directly to your hearing aids—from an iPhone® or other Sonic accessories—with 2.4 GHz Bluetooth Low-Energy (BLE) and Near Field Magnetic Induction (NFM). This two-part wireless system in Trek is direct, fast, and reliable.

**Expand your access to even more sound possibilities with these connectivity options:**

**SoundLink 2 App**—Download the free app to change your listening program, adjust the volume, control tinnitus relief sounds, or switch between accessories, all from your iPhone® or Android™ smartphone. You can even view the battery percentage display, so you know when it's time to change your batteries.

**SoundClip-A**—Stream sound in stereo from a wide variety of Bluetooth®-compatible devices. This accessory also functions as a remote microphone, remote control, and enables your Trek hearing aids to work as wireless headphones for hands-free calls.

**TV-A Adapter**—Stream audio from a TV through Trek. This adapter easily connects to most TVs.

**RC-A Remote Control**—Adjust volume and programs with a click using this remote that is lightweight and discreet.

**If This Then That**—IFTTT is a web-based service that connects all kinds of digital devices through the Internet of Things to make life more convenient. For example, Trek can send an audible signal for an email or a text message when the hearing aid battery is low. Requires SoundLink 2 app.
